

Appendix 5A: Characteristics of National Samples

Australia

Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 5), non-mainstream schools, and very remote schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by state or territory (8)
- Implicit stratification by geographic location (metropolitan, provincial, remote), school type (catholic, government, independent), and socioeconomic index (low socioeconomic status, high socioeconomic status)
- Prior to class sampling within schools, all indigenous students were grouped into a single classroom and were selected with certainty. Other classroom was sampled using the standard procedure.
- No overlap between Grade 4 and Grade 8 school samples
- Schools were oversampled at the state/territory level

Allocation of School Sample in Australia, Fourth Grade

Explicit Strata	Total Sampled Schools	Ineligible Schools	Participating Schools			Refusal Schools	Excluded Schools
			Original Schools	1st Replacements	2nd Replacements		
Australian Capital Territory	30	0	30	0	0	0	0
New South Wales	45	0	45	0	0	0	0
Northern Territory	15	0	15	0	0	0	0
Queensland	45	1	43	0	0	1	0
South Australia	40	0	39	0	0	1	0
Tasmania	30	0	30	0	0	0	0
Victoria	45	0	43	1	1	0	0
Western Australia	40	0	40	0	0	0	0
Total	290	1	285	1	1	2	0

Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 5), non-mainstream schools, and very remote schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by state or territory (8)
- Implicit stratification by geographic location (metropolitan, provincial, remote), school type (catholic, government, independent), and socioeconomic index (low socioeconomic status, high socioeconomic status)
- Within sampled schools, all indigenous students were regrouped into a single classroom that was sampled with certainty. When appropriate, classrooms were grouped according to the ability level of students prior to sampling and one classroom was sampled per class group.
- No overlap between Grade 4 and Grade 8 school samples
- Schools were oversampled at the state/territory level

Allocation of School Sample in Australia, Eighth Grade

Explicit Strata	Total Sampled Schools	Ineligible Schools	Participating Schools			Refusal Schools	Excluded Schools
			Original Schools	1st Replacements	2nd Replacements

Western Australia	40	0	40	0	0	0	0
Total	290	3	285	0	0	2	0

Bahrain

Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 1), special needs schools, students taught in French, and students taught in Japanese
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by governorate (5), and gender (girls, boys) within public schools
- No implicit stratification
- Sampled two classrooms per school
- No overlap between Grade 4 and Grade 8 school samples
- All schools were selected
- Schools or classes were used as variance estimation strata and classes or half classes were used to build jackknife replicates

Allocation of School Sample in Bahrain, Fourth Grade

Explicit Strata	Total Sampled Schools	Ineligible Schools	Participating Schools			Refusal Schools	Excluded Schools
			Original Schools	1st Replacements	2nd Replacements		
Public Muharraq - Girls	10	0	10	0	0	0	0

Belgium (Flemish)

Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 5)
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by region (6), socioeconomic status (2), school type (official, private), and a stratum of eligible special education schools
- No implicit stratification
- Sampled two classrooms in large schools (measure of size > 35)
- TIMSS 2015 Main Data Collection and PIRLS 2016 Field Test school samples were selected simultaneously to avoid overlap

Allocation of School Sample in Belgium (Flemish), Fourth Grade

Explicit Strata	Total Sampled Schools	Ineligible Schools	Participating Schools			Refusal Schools	Excluded Schools
			Original Schools	1st Replacements	2nd Replacements		
Antwerpen - High SES	16	0	12	2	1	1	0
Antwerpen - Low SES	24	0	14	7	2	1	0

Total	159	2	117	23	13	4	1

Botswana

Ninth Grade

Coverage and Exclusions

- Coverage is 100 percent
- No school level exclusions
- Within-school exclusions consisted of students with intellectual disabilities, and students with functional disabilities

Sample Design

- Explicit stratification by school type (public, private), region (6), and socioeconomic status (medium to high socioeconomic status, low socioeconomic status)
- No implicit stratification
- Sampled one classroom except in private schools where two classrooms were sampled
- Census for private schools
- In census stratum, schools or classes were used as variance estimation strata and classes or half classes were used to build jackknife replicates

Allocation of School Sample in Botswana, Ninth Grade

Explicit Strata	Total Sampled Schools	Ineligible Schools	Participating Schools			Refusal Schools	Excluded Schools
			Original Schools	1st Replacements	2nd Replacements		
Central - Medium to High Mean SES	32	0	32	0	0	0	0

Private	17	0	17	0	0	0	0
Total	159	0	159	0	0	0	0

Bulgaria

Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 5) and special needs schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by school type (elementary, basic, general) and urbanization (capital, large cities, other)
- Implicit stratification by urbanization (city, village) within the basic schools found outside the larger cities
- Sampled two classrooms per school

Allocation of School Sample in Bulgaria, Fourth Grade

Explicit Strata	Total Sampled Schools	Ineligible Schools	Participating Schools			Refusal Schools	Excluded Schools
			Original Schools	1st Replacements	2nd Replacements		
Elementary School - Capital and Large Cities	8	0	8	0	0	0	0
Elementary School - Other	8	0	8	0	0	0	0
Basic School - Capital	10	0	10	0	0	0	0
Basic School - Large Cities	28	0	26	0	0	2	0
Basic School - Other	44	0	42	0	0	2	0
General School - Capital	14	1	12	0	1	0	0
General School - Large Cities	18	0	18	0	0	0	0
General School - Other	24	0	24	0	0	0	0
Total	154	1	148	0	1	4	0

Canada

Fourth Grade

Coverage and Exclusions

- Coverage is 78.9 percent. Coverage in Canada is restricted to students from the provinces of Alberta, Manitoba, Newfoundland, Ontario, and Quebec.
- School-level exclusions consisted of very small schools (measure of size < 10 in Quebec and measure of size < 6 in Ontario, Alberta, Manitoba, and Newfoundland), special needs schools, international schools (in Quebec), federal schools (in Quebec), school boards with special status (in Quebec), band-operated schools (First Nation and Native schools), French schools (in Newfoundland), public special needs schools (in Manitoba), as well as private and home schools (in Manitoba)
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by provinces (5). Within the province of Alberta, explicit stratification was done by school system (French, English), and school type (immersion, regular). Within the province of Ontario, explicit stratification was done by 'Grade 4'/'Grade 4 and Grade 8', language (English, French) and school type (private, Catholic, public). Within Quebec, explicit stratification was done by school type (public, private) and language (French, English).
- Implicit stratification by region (4) in public and Catholic explicit strata within Ontario. Postal code (6) in English school system strata within Alberta.
- Sampled two classrooms in large schools for Quebec, two classroom per school for Ontario and Alberta, and one classroom per school for the rest of Canada
- Grade 4 and Grade 8 school samples were selected separately, with the exception of Ontario where Grade 4 and Grade 8 school samples were selected simultaneously with maximum overlap
- All Alberta French schools were selected
- In Alberta French schools classes were used as variance estimation strata and half classes were used as jackknife replicates

Allocation of School Sample in Canada, Fourth Grade

Explicit Strata	Total Sampled Schools	Ineligible Schools	Participating Schools			Refusal Schools	Excluded Schools
			Original Schools	1st Replacements	2nd Replacements		
Manitoba - Grade 4 & Grade 8	7	0	7	0	0	0	1
Newfoundland - Grade 4 & Grade 8	8	0	8	0	0	0	0
Ontario - Grade 4 - Private	8	0	3	0	0	5	0
Ontario - Grade 4 - English - Catholic	8	0	8	0	0	0	0
Ontario - Grade 4 - English - Public	40	0	39	0	0	1	0
Ontario - Grade 4 - French - Catholic & Public	8	0	8	0	0	0	0
Ontario - Grade 4 & Grade 8 - English - Catholic	36	1	35	0	0	0	0
Ontario - Grade 4 & Grade 8 - English - Public	59	0	58	0	0	1	1
Quebec - Grade 4 - Private - English	8	0	8	0	0	0	0
Quebec - Grade 4 - Private - French	8	0	8	0	0	0	0
Quebec - Grade 4 - Public - English	40	0	38	1	0	1	2
Quebec - Grade 4 - Public - French	118	0	47	16	3	52	0
Alberta - Grade 4 - French System	27	0	26	0	0	1	0
Alberta - Grade 4 - English System - Immersion Schools	21	1	16	2	0	2	0
Alberta - Grade 4 - English System - Regular Schools	120	1	94	13	3	9	0
Total	516	3	403	32	6	72	4

Eighth Grade

Coverage and Exclusions

- Coverage is 67.3 percent. Coverage in Canada is restricted to students from the provinces of Manitoba, Newfoundland, Ontario, and Quebec.
- School-level exclusions consisted of very small schools (measure of size < 10 in Quebec and measure of size < 6 in Ontario, Manitoba, and Newfoundland), special needs schools, international schools (in Quebec), federal schools (in Quebec), school boards with special status (in Quebec), band-operated schools (First Nation and Native schools), and French schools (in Newfoundland)
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by Provinces (4). Within the province of Ontario, explicit stratification was done by 'Grade 8'/'Grade 4 and Grade 8', language (English, French) and school type (private, Catholic, public). Within the province of Quebec, explicit stratification was done by school type (public, private) and language (French, English).
- Implicit stratification by region (4) in public and Catholic explicit strata within Ontario. Achievement within Quebec (Used in all strata with the exception of private -English stratum).
- Sampled two classrooms in large schools for Quebec and Ontario, one classroom per school for the rest of Canada
- Grade 4 and Grade 8 school samples were selected separately, with the exception of Ontario where Grade 4 and Grade 8 school samples were selected simultaneously with maximum overlap

Allocation of School Sample in Canada, Eighth Grade

Total	343	6	253	22	1	61	1

Chile

Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 5), special needs schools, and geographically inaccessible schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by 'Grade 4'/'Grade 4 and Grade 8' schools, school type (public, private subsidized, private paid), and urbanization (rural, urban)
- Sampled one classroom
- Grade 4 and Grade 8 school samples were selected simultaneously with maximum overlap
- Private paid schools were oversampled

Allocation of School Sample in Chile, Fourth Grade

Explicit Strata	Total Sampled Schools	Ineligible Schools	Participating Schools			Refusal Schools	Excluded Schools
			Original Schools	1st Replacements	2nd Replacements		
Grade 4 - Rural	8	0	7	1	0	0	0

Chinese Taipei

Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of special needs schools and newly founded schools without student information
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by urbanization (rural, city, metropolitan)
- No implicit stratification
- Sampled two classrooms in large schools (measure of size > 300)
- No overlap between Grade 4 and Grade 8 school samples

Allocation of School Sample in Chinese Taipei, Fourth Grade

Explicit Strata	Total Sampled Schools	Ineligible Schools	Participating Schools			Refusal Schools	Excluded Schools
			Original Schools	1st Replacements	2nd Replacements

England

Fifth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 9), special needs schools, and international schools
- Within-school exclusions consisted of students with intellectual disabilities

Sample Design

- Explicit stratification by school type (state-funded, private), and attainment level (5)
- No implicit stratification
- Sampled two classrooms in large schools (measure of size > 90)
- Samples for Grade 4 and Grade 8 were drawn separately and no overlap between the two samples

Allocation of School Sample in England, Fifth Grade

Italy

Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 5), Slovenian language schools, Ladin language schools, and German language schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by school type (private, public), region (6) within public schools. A census of schools was taken in Bolzano.
- No implicit stratification
- Sampled two classrooms in large schools (measure of size > 110)
- The school sample for TIMSS at Grade 8 was selected by controlling for the overlap with the sample at Grade 4 using the Chowdhury approach
- In Bolzano schools or class were used as variance estimation strata and classes or half classes were used to build jackknife replicates. Two classrooms selected within these schools whenever possible.

Allocation of School Sample in Italy, Fourth Grade

Explicit Strata	Total Sampled Schools	Ineligible Schools	Participating Schools			Refusal Schools	Excluded Schools
			Original Schools	1st Replacements	2nd Replacements

Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 10)
- No within-school exclusions

Sample Design

- Explicit stratification by school type (private, public) and region (16)
- Implicit stratification by urbanization (urban, rural) within public sector
- Sampled two classrooms in public schools from the region of Oued eddhab Lagouira and Laayoune Boujdour Sakia Hamra
- No overlap between Grade 4 and Grade 8 school samples
- Schools at the regional level were oversampled. Census in the region of Oued eddhab Lagouira and Laayoune Boujdour Sakia Hamra.
- In census strata, schools or classes were used as variance estimation strata, and classes or half classes were used to build jackknife replicates

New Zealand

Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 4), special needs schools, correspondence schools, Maori-medium Level 1 immersion schools, and mostly students in Level 1-2 immersion units schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by school type (state, independent), socioeconomic status (low, moderately low, moderately high, high), and urbanisation (major urban centers, smaller centers)
- No implicit stratification
- Sampled two classrooms per school
- The school sample for TIMSS at Grade 8 was selected by controlling for the overlap with the sample at Grade 4 using the Chowdhury approach

Allocation of School Sample in New Zealand, Fourth Grade

Portugal

Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 6), special needs schools, and minority language schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by region (7) and school type (public, private)
- No implicit stratification
- Sampled two classrooms in large schools (measure of size > 140)
- No overlap between TIMSS 2015 and PIRLS 2016 main data collection samples except in the 6 smallest strata where all schools are sampled
- Probability proportional to (school) size systematic sampling was used in the 3 largest explicit strata, and systematic sampling selection with equal probabilities was used in all other strata

Russian Federation

Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 4) and special needs schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by region (42)
- No implicit stratification
- Sampled one classroom per school
- No overlap between Grade 4 and Grade 8 school samples
- An extra sampling stage (regions) was required prior to sampling schools. 28 of 69 regions were selected with probability proportional to the region size and 14 bigger regions were selected with certainty. While each certainty region itself is an explicit stratum, the other sampled regions make one large explicit stratum. In the large explicit stratum, a sample of schools is selected within each region.
- Within regions, schools were selected with probability proportional to (school) size systematic sampling. Schools were sorted (serpentine) by location (up to 7 levels) before being sorted by school size.
- Within the certainty regions, schools were paired for variance calculation purposes. Otherwise, selected regions were paired for variance calculation purposes.

Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 4), special needs schools, and evening schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by region (42)
- No implicit stratification
- Sampled one classroom per school
- No overlap between Grade 4 and Grade 8 school samples
- An extra sampling stage (regions) was required prior to sampling schools. 28 of 69 regions were selected with probability proportional to the region size and 14 bigger regions were selected with certainty. While each certainty region itself is an explicit stratum, the other sampled regions make one large explicit stratum. In the large explicit stratum, a sample of schools is selected within each region.
- Within regions, schools were selected with probability proportional to (school) size systematic sampling. Schools were sorted (serpentine) by location (up to 7 levels) before being sorted by school size.
- Within the certainty regions, schools were paired for variance calculation purposes. Otherwise, selected regions were paired for variance calculation purposes.

Singapore

Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of special needs schools and private schools
- No within-school exclusions
- For TIMSS 2015, like in all previous cycles, Singapore took a census of all public schools with Grade 4 or Grade 8 students. The sampling frame excluded private schools, which are largely foreign-system schools operating in Singapore and which serve predominantly international students. These foreign-system schools are fundamentally different from the public schools in many respects (e.g., language of instruction; school-calendar year).

Sample Design

- No explicit stratification
- No implicit stratification
- Sampled two classrooms per school
- No overlap between Grade 4 and Grade 8 school samples
- Census of all schools. Within schools, two half classrooms were sampled with probability proportional to the size of the classroom. Within selected classrooms, 19 students were randomly sampled.
- Schools or classes were used as variance estimation strata and classes or half classes were used to build jackknife replicates

Allocation of School Sample in Singapore, Fourth Grade

Spain

Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 4), special needs schools, and international schools
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by region (7) and school type (public, private)
- No implicit stratification
- Sampled one classroom per school except for the private schools in La Rioja where two classrooms were sampled whenever possible
- Oversampled in Asturias, La Rioja, Castile and Leon, Catalonia, Andalusia and Madrid in order to get better estimates. In La Rioja-private stratum all schools were taken.
- In La Rioja- private stratum, schools or classrooms were used as variance estimation strata and classrooms or half classrooms were used to build jackknife replicates. Two classrooms selected within these schools whenever possible.

United Arab Emirates

Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 15) in Abu Dhabi and other Emirates, (measure of size < 10) in Dubai, instruction language other than English or Arabic, and geographically inaccessible schools in Emirates other than Dubai and Abu Dhabi
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by 'Grade 4' / 'Grade 4 and Grade 8' schools, Emirates (7), national assessment score (4) and curriculum (Ministry of Education, UK/US/CAD, other). School type (public, private) within Dubai. Region (Abu Dhabi, Al Ain, Western region), school type (public, private), and performance level (low, medium, high) within Abu Dhabi.
- Implicit stratification by educational zones (Ajman, Fujairah, Ras Al Khaimah, Sharjah, Umm Al Quwain) and language of test (Arabic, English, French)
- Sampled two classrooms in schools from the western region, from 'Grade 4' schools in Abu Dhabi, from Dubai and from regions other than Sharjah
- Grade 4 and Grade 8 school samples were selected simultaneously with maximum overlap
- All schools were sampled in all regions except Sharjah, in Western region of Abu Dhabi and in Dubai
- The United Arab Emirates was divided into three large districts: Abu Dhabi (Abu Dhabi, Al Ain, and West region), Dubai, and the rest of the Emirates. All three districts were oversampled.
- In census strata, classes or half classes were used to build jackknife replicates for variance estimation. Two classrooms selected within these schools.

Fourth Grade

Coverage and Exclusions

- Coverage is 100 percent
- School-level exclusions consisted of very small schools (measure of size < 10), and instruction language other than English or Arabic
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by 'Grade 4/' 'Grade 4 and Grade 8' schools, and school type (public, private)
- Implicit stratification by language of test (Arabic, English, French)
- Sampled two classrooms per school
- Grade 4 and Grade 8 school samples were selected simultaneously with maximum overlap
- Census of all schools
- Schools or classes were used as variance estimation strata and classes or half classes were used to build jackknife replicates. Some schools are paired together within explicit stratum when there is only one class participating.

Allocation of School Sample in Dubai, United Arab Emirates, Fourth Grade

Explicit Strata	Total Sampled Schools	Ineligible Schools	Participating Schools			Refusal Schools	Excluded Schools
			Original Schools	1st Replacements	2nd Replacements		
Grade 4 - Private	37	0	37	0	0	0	0
Grade 4 - Public	25	0	25	0	0	0	0
Grade 4 & Grade 8 - Private	105	2	103	0	0	0	0
Grade 4 & Grade 8 - Public	3	0	3	0	0	0	0
Total	170	2	168	0	0	0	0

Eighth Grade

Coverage and Exclusions

- Coverage is 100 percent

Florida, United States

Fourth Grade

Coverage and Exclusions

- Coverage is 89.8 percent. Coverage in USA Florida is restricted to students from public schools.
- No school level exclusions
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by poverty level (high, low)
- Implicit stratification by location (city, suburb, town, rural) and ethnicity status (above 15% non-White students in a school, below 15% non-White students in a school)
- Sampled one classroom per school
- TIMSS sample was selected using the Chowdhury method to minimize overlap with the TIMSS USA sample and the Alpha and the Beta NAEP samples
- No overlap between Grade 4 and Grade 8 school samples

Allocation of School Sample in Florida, United States, Fourth Grade

Explicit Strata	Total Sampled Schools	Ineligible Schools	Participating Schools			Refusal Schools	Excluded Schools
			Original Schools	1st Replacements	2nd Replacements		
High poverty	37	1	36	0	0	0	0
Low poverty	17	0	17	0	0	0	0
Total	54	1	53	0	0	0	0

Eighth Grade

Coverage and Exclusions

- Coverage is 90.1 percent. Coverage in USA Florida is restricted to students from public schools.
- No school level exclusions
- Within-school exclusions consisted of students with intellectual disabilities, students with functional disabilities, and non-native language speakers

Sample Design

- Explicit stratification by poverty level (high, low)
- Implicit stratification by location (city, suburb, town, rural) and ethnicity status (above 15% non-White students in a school, below 15% non-White students in a school)
- Sampled one classroom per school
- TIMSS sample was selected using the Chowdhury method to minimize overlap with the TIMSS USA sample, the Alpha and the Beta NAEP samples.
- No overlap between Grade 4 and Grade 8 school samples
